**Subject: Yanbu Power and Desalination Plant – Phase 3
Package “D” Desalination Plant
Fuel Oil Additive for Auxiliary Boilers**

To Whom so ever it may concern.

We are pleased to issue this letter to Al Dousor International Co Ltd., Jeddah Kingdom of Saudi Arabia who participated our SWCC Yanbu Phase 3 project through the supply of Magnesium based Boiler Fuel Oil Additive, Protea M-228 to protect the boilers from hot and cold end corrosions. We are satisfied with the performance of Protea M-228 and the technical support by the Al Dousor team. We found that the additive is economical in terms of price and consumption. We have therefore recommended continuous use of Protea M-228 to the owner of the project M/s.Saline Water Conversion Corporation after the commissioning period.
